## Word from the president.

Tunisia Aluminum Profiles was established in 1978 by the late Youssef Bayahi. At that time, he took the gamble of democratizing the use of aluminum in Tunisia, when the market only amounted to 200 tons per year, barely equivalent to two days' worth of production today.

Since 1978, we have embarked on this remarkable journey together, crafting our story. And it is undoubtedly within this shared experience that we find our greatest success.

This collaborative spirit has become our daily inspiration, propelling us towards the forefront of innovation at TPR.

We have reinvented our classics, surpassed our own limitations, and envisioned the future.

Always in line with our core values: quality, craftsmanship, and innovation.

With more than four decades of unwavering dedication and mastery, we stand as true experts in our field, ready to shape the next chapter of our story.

“  
***OVER 40 YEARS OF EXPERTISE***  
”

**Yahia Bayahi**

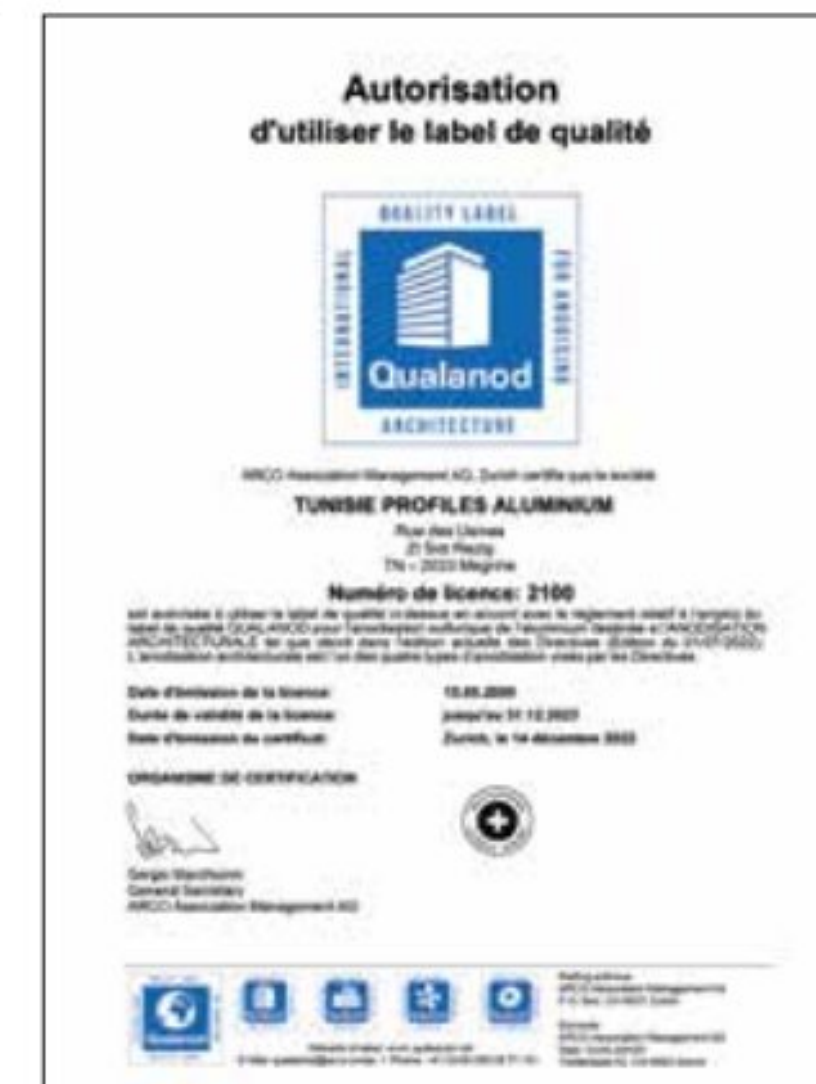

Chief Executive Officer  
Tunisia Aluminium Profiles

# QUALITY, AT THE HEART OF OUR VALUES

Quality is a fundamental pillar of our values and strategy, deeply ingrained in everything we do. It is the guiding principle that drives our actions and shapes our identity as a company.

Our approach to quality is present and respected at every stage of the production process, as evidenced by our internationally recognized certifications. With 133 checkpoints during production and 250 control and measurement equipment, we leave no room for compromise when it comes to ensuring the highest standards of quality. Each step of our manufacturing process is meticulously monitored and evaluated to guarantee that our products meet or exceed the expectations of our customers.

*Quality :  
a perpetual process*

# THE HUMAN AND TECHNOLOGICAL KNOW-HOW IN CONSTANT EVOLUTION

Our commitment to excellence is not only reflected in the quality of our products but also in the continuous evolution of our human and technological expertise. At TPR, we understand that staying at the forefront of our industry requires a harmonious blend of human ingenuity and cutting-edge technology. We place equal emphasis on nurturing the expertise and skills of our dedicated team members. We firmly believe that the fusion of human craftsmanship and technological innovation is the secret to our success.

That's why we invest significant time and resources in training and upskilling our workforce, ensuring that they are equipped with the latest techniques and best practices to guarantee optimal performance and efficiency throughout our operations.

*Over 40 years  
of expertise*

## INNOVATION AND DESIGN EMBEDDED IN OUR DNA

Our design office, consisting of architects and engineers, operates with a keen ear for our clients' needs and surrounding environment to fulfill the aspirations of each individual.

We have always fostered a culture of innovation that permeates every aspect of our product range, encompassing all levels of our offerings. Our focus is on delivering modern and tailored solutions that cater to a diverse range of needs.

In our pursuit of innovation, we prioritize user comfort as a primary consideration. Every innovation we develop is carefully crafted to enhance the experience of the end user, all while maintaining a strong emphasis on aesthetics.

## SURFACE TREATMENT IN COMPLIANCE WITH STANDARDS

We offer an extensive range of colors and finishings for our aluminum profiles. The surface treatment is carried out in-house through a dedicated unit exclusively for powder coating and anodizing, certified by renowned international labels.

Providing our customers with the freedom to embellish aluminum according to their preferences is of utmost importance to us. We offer a variety of material effects, including wood-like finishes, and play with light to create captivating visual aesthetics, all while upholding the highest standards of quality. By offering a wide array of options, we empower our customers to transform aluminum into something exceptional, allowing their creative visions to come to life. Whether it's adding texture, depth, or a touch of elegance, our surface treatments enable customers to achieve their desired outcomes while maintaining the impeccable quality.

*Commit,  
innovate,  
evolve...*

## ENVIRONMENTAL RESPECT, AN ESSENTIAL PREREQUISITE

Environmental respect serves as the driving force and guiding principle behind every step of our production process. In 2006, a significant milestone marked our journey towards sustainability. We proudly inaugurated our own foundry, where we redirect all our waste to be transformed into valuable raw materials.

This commitment to recycling is just one aspect of our larger environmental agenda. Each year, we eagerly explore new pathways to improve our ecological footprint, investing in cutting-edge technologies that elevate our sustainability practices to new heights. At TPR, we firmly believe that progress goes hand in hand with environmental responsibility.

Our commitment to environmental preservation drives us to push boundaries, challenge conventions, and reimagine what's possible. We are proud to be pioneers, charting a course towards a greener future.

*Nothing is lost,  
everything is transformed*

### ■ TYPOLOGY

### TECHNICAL SPECIFICATIONS

- Frame thickness: 60mm
- Leaf thickness: 34mm
- Double glazing up to 26mm
- Leaf weight up to 200kg
- High-quality EPDM gaskets
- Fin-Seal central film brush seals

Very modern and contemporary, the new angle sliding door offers a full 90° opening for exceptional architecture.

# TS60 COMFORT

## THERMAL BREAK SLIDING WINDOWS AND PATIO DOORS

### ■ ACCESSORIES

### ■ POCKET SLIDING SYSTEM

- Frame thickness: 60mm
- Leaf thickness: 34mm
- Double glazing up to 26mm
- Max width per leaf up to 1.5m
- Max height per leaf up to 2.7m
- Leaf weight up to 200kg
- Removable threshold

### ■ TYPOLOGY

### ■ PATIO DOOR CUT

STRAIGHT LINE PATIO DOOR CUT

CURVED LINE PATIO DOOR CUT

U

The thermal conductivity coefficient ( $U_w$ ) for a 2-leaf patio door with dimensions:  
Width (L) = 1.85m and Height (H) = 2.18m  
 $U_g = 1.1 \text{ W/m}^2\cdot\text{K}$   
 $U_w = 2.10 \text{ W/m}^2\cdot\text{K}$

The TS60 sliding system is always in style. With the new pocket sliding system, the panels disappear into the wall thickness when opened, providing a completely unobstructed passage.

# TW74 PIVOT DOOR

NEW

## THERMAL BREAK PIVOT DOOR

### ■ ACCESSORIES

### ■ TYPOLOGY

### ■ PATIO DOOR CUT

### TECHNICAL SPECIFICATIONS

- Frame thickness: 74mm ,
- Leaf thickness: 74mm,
- Glazing or panel thickness up to 57mm,
- Leaf weight up to 170kg,

#### PIVOT:

- Adjustable force from 2 to 4 EN (14-28 Nm),
- Hydraulic control for 150° rotation in both directions,
- Adjustable closing speed and final snap,

U

The thermal conductivity coefficient ( $U_w$ ) for a 2-leaf pivot door with dimensions:  
Width (L) = 2.30m and Height (H) = 2.10m  
 $U_g = 1.0 \text{ W/m}^2 \cdot \text{K}$   
 $U_w = 1.48 \text{ W/m}^2 \cdot \text{K}$

A trio of energy efficiency, security, and robustness. The new TW74 pivot door allows for very large entrance doors.

# TW74 COMFORT WINDOW

NEW

## THERMAL BREAK HINGED WINDOWS AND PATIO DOORS

### ■ ACCESSORIES

### ■ TYPOLOGY

### ■ PATIO WINDOW CUT

### TECHNICAL SPECIFICATIONS

- Frame thickness: 74mm.
- Leaf thickness: 82mm.
- Integrated or applied cover joints.
- Applied threshold.
- Adjustable anti-slip clamp hinges for heavy loads.
- Multipoint security locks.
- Glazing up to 57mm with straight glazing bead.

U

The thermal conductivity coefficient ( $U_w$ ) for a 2-leaf hinged door with dimensions: Width (L) = 2.30m and Height (H) = 2.10m  
 $U_g = 1.0 \text{ W/m}^2\cdot\text{K}$   
 $U_w = 1.48 \text{ W/m}^2\cdot\text{K}$

To meet European standards for insulation and energy efficiency, the TW74 series offers real thermal, acoustic, and sealing performance.

# TW60 COMFORT WINDOW

# 52 HORIZON+ VEC RPT

GLAZED EXTERNAL STRUCTURE BONDED (VEC)  
WITH THERMAL BREAK

## ■ ACCESSORIES

## ■ HORIZONTAL CUT ON MULLION

## ■ VERTICAL CUT ON TRANSOM

## TECHNICAL SPECIFICATIONS

- Visible width of 52mm.
- Vision or opaque filling panels in multi-chamber profiles with R.P.T assembled by double crimping brackets.
- Manual or motorized Italian-style or parallel opening.
- Double glazing with offset edges from 24 to 36mm.
- Maximum weight 130kg.
- 14mm gap between panels.
- Thermal conductivity coefficient  
 $UF = 3,55 \text{ W/m}^2\text{K}$

When aluminum serves glass.  
A smooth and homogeneous appearance  
for a fully glazed facade with invisible  
fixings.

# 52 HORIZON+ VEP RPT

GLAZED EXTERNAL STRUCTURE PARCLOSED (VEP)  
WITH THERMAL

## ■ ACCESSORIES

## ■ HORIZONTAL CUT ON MULLION

## ■ VERTICAL CUT ON TRANSOM

## TECHNICAL SPECIFICATIONS

- Visible width of 52mm.
- Vision or opaque filling panels in multi-chamber profiles with R.P.T assembled by double crimping brackets.
- Manual or motorized Italian-style or parallel opening.
- Parclosed double glazing from 24 to 36mm.
- Maximum weight 130kg.
- 14mm gap between panels.
- Thermal conductivity coefficient  
 $UF = 4,07 \text{ W/m}^2\text{,K}$

An aluminum facade with a checkerboard appearance. A lightweight aluminum structure facade with glass panels installed from the outside and held by parclose, allowing for a combination of fixed and opening panels.

# 52 HORIZON+ COLD VEC

## EXTERIOR GLAZING FACADE (VEC)

### ■ ACCESSORIES

### ■ HORIZONTAL CUT ON MULLION

### ■ VERTICAL CUT ON TRANSOM

### TECHNICAL SPECIFICATIONS

- Visible width structure: 52mm.
- Vision or opaque filling panels with multi-chamber profiles assembled by double crimped brackets.
- Opening with manual or motorized inward or parallel movement.
- Double glazing with offset edges from 24 to 36mm.
- Maximum weight: 130kg.

When aluminum serves glass.  
A smooth and homogeneous appearance for a  
fully glazed facade with invisible fixings.

### TECHNICAL SPECIFICATIONS

- Visible width structure: 52mm.
- Vision or opaque filling panels with multi-chamber profiles assembled by double crimped brackets.
- Opening with manual or motorized inward or parallel movement.
- Parclosed double glazing from 24 to 36mm.
- Maximum weight: 130kg.
- 4mm hollow joint between panels.

An aluminum facade with a "checkerboard" appearance. A lightweight facade with an aluminum structure where the externally installed glass panels are held by parclose profiles, allowing for a combination of fixed and opening panels.

# 52 HORIZON+ TRD

## TRADITIONAL FACADE (TRD)

### ■ ACCESSORIES

### ■ HORIZONTAL CUT ON MULLION

### ■ VERTICAL CUT ON TRANSOM

### TECHNICAL SPECIFICATIONS

- Visible width structure: 52mm.
- Panels held horizontally and vertically by clamps.
- Opening with manual or motorized inward or parallel movement.
- Double glazing up to 40mm.
- Choice of horizontal and vertical caps.
- Thermal conductivity coefficient  
 $UF = 2.57 \text{ W/m}^2\text{K}$ .

Ideal for curtain wall constructions with a particularly thin aesthetic and minimal visible structure.

# 52 HORIZON+ TH

## HORIZONTAL GRID FACADE (T.H)

### ■ ACCESSORIES

### ■ HORIZONTAL CUT ON MULLION

### ■ VERTICAL CUT ON TRANSOM

### TECHNICAL SPECIFICATIONS

- Visible width structure: 52mm.
- Panels held horizontally by clamps and vertically by joints.
- Opening with manual or motorized inward or parallel movement.
- Double glazing up to 40mm.
- 26mm vertical joint and choice of horizontal caps.
- Thermal conductivity coefficient  
 $UF = 2.71 \text{ W/m}^2\text{.K}$ .

Facade with an emphasized external appearance through horizontal caps.

# 52 HORIZON+ SMOOTH

EXTERIOR GLAZING FACADE  
(VEA)

## ■ ACCESSORIES

## ■ HORIZONTAL CUT ON MULLION

## ■ VERTICAL CUT ON TRANSOM

## TECHNICAL SPECIFICATIONS

- Structure composed of mullions and transoms of the same section and a visible width of 52mm.
- External appearance defined by 20mm vertical and horizontal silicone joints.
- 30mm double laminated glass.
- Fixing system to the main structure using aluminum alloy parts

An ideal system for large-scale facades  
with a minimal visible structure.
